

Warsaw, 27th May 2015**Half of PRIME Corporate Center with glazed façade**

Intensive glazed façade installation works are under way at construction site of PRIME Corporate Center, which is under development at Grzybowska 78 in Warsaw. In the end of May, the distinctive glass panes reached the height of 11th floor of the building. The façade installation is scheduled for completion in the middle of October this year.

The floor-to-ceiling windows assembled on the PRIME Corporate Center's facade – manufactured in a Częstochowa-based glassworks of Guardian – will provide an excellent daylight access to the interiors, at the same time maintaining high energy-efficiency of the building.

Busy with façade installation works are approx. 45 people on-site, who have already completed fitting over 9 kilometers of aluminum façade profiles in just three months. These profiles have been individually designed and manufactured by Aluprof. Workers installed 1 300 double glazed windows – amounting to a total weight of over 190 tonnes – into such profiles. One building's storey is surrounded by between 132 and 173 glass panes. The heaviest facade panels weight even 250 kilograms.

Mounted alongside the façade panel installation are the LED lighting elements that will illuminate the building's glazed walls.

Simultaneously, works on erecting top storeys of PRIME Corporate Center's tower are nearing completion. The contractor is also preparing the finishing of the office space and common areas inside the building. The installation of marble lining in the reception lobby, made of natural Volakas stone from Greece, is scheduled to begin in July.

PRIME Corporate Centre will be put to use in the first quarter of 2016 and employees of Raiffeisen Polbank will move into bank's new headquarters in the 1st half of 2016.

The building was designed by the architects of Solomon Cordwell Buenz from Chicago in local cooperation with architecture firm Epstein. The investment is being delivered in line with BREEAM „Very good” ecological certificate standards.
